📍 Tannenbergsstr. 20, 70374 Stuttgart, Germany

Professional Summary

AI Engineer with experience in machine learning, deep learning, generative AI and 3D reconstruction. Developing practical AI solutions, from data pipelines and model development to evaluation and implementation, with a focus on turning research ideas into workable systems. Strong software engineering foundation combined with a practical problem-solving mindset and a focus on building reliable AI solutions for real-world applications.

Education

Eberhard Karls Universität Tübingen <i>M.Sc. Artificial Intelligence (Exchange Program)</i>	Tübingen, Germany <i>Oct. 2025 – July. 2026</i>
University of Verona <i>Master of Science in Artificial Intelligence</i>	Verona, Italy <i>Oct. 2023 – July. 2026</i>
Guangxi University <i>Bachelor of Science in Computer Science</i>	Guangxi, China <i>Oct. 2018 – July. 2022</i>

Work Experience

Tübingen AI Center Computer Vision & Deep learning Intern for Augmented Reality - Trained and evaluated end-to-end diffusion and generative model pipelines for high-fidelity 3D scene reconstruction - Designed automated 3D asset generation workflows to dynamically inject and validate interactive objects	Tübingen, Germany <i>Nov. 2025 – July. 2026</i>
Atacod Software Engineer - Led the integration of automated document management systems with client ERP architectures, minimizing data discrepancies and accelerating processing cycles - Designed data-augmentation methods that held classification accuracy under sparse data, reducing data-collection.	Verona, Italy <i>Jun/ 2024 – Jun/ 2025</i>
Guangxi Nanning Xinyue Technology Software Engineer - Developed high-performance cross-platform modules and backend services for traffic, large-scale deployment. - Collaborated with the team through the full development cycle—building, testing, and releasing to a live user base.	Nanning, China <i>Oct. 2022 – Sep. 2023</i>
Neo-Elite Working Student - Monitoring Network configurations, local server, and internal systems to maintain high availability and data integrity. - Provided technical troubleshooting directly to educational staff, bridging communication differences seamlessly.	Nanning, China <i>Jan. 2019 – Nov. 2019</i>

Projects

Var-Group AI Hackathon, Selected University Representative - Selected as one of two university delegates; built working data pipelines under a tight deadline. - Co-developed an energy-data analytics platform to optimize efficiency metrics for industrial clients.	<i>Oct. 2025</i>
NBFC Future Center Upskilling, Selected Software Engineer - Selected among top 120 young talents for an intensive program supported by NextGenerationEU. - Developed a startup concept: Monitoring Early Warning System, with targeted training on sustainability and innovation.	<i>May. 2025 – July. 2025</i>
London School of International Business, Practical Course - Applied ML/DL and data analysis, computer vision for remote sensing and NLP for text processing. - Ran end-to-end pipelines covering collection, preprocessing, analysis, and visualization.	<i>Aug. 2025 – Sep. 2025</i>

Skills

Programming	Python, JavaScript, HTML, CSS
Frameworks & libraries	PyTorch, TensorFlow, NumPy, Pandas, XGBoost, Matplotlib
Software & Tools	Git, Linux, Cluster SSH, VSCode, Jupyter
Languages	English (Fluent). Chinese (Advanced). Italian (Advanced). German (Basic). Persian (Native)
